EXPERIENCE

Jivika **Sep 2025 – Nov 2025**
Software Development Intern *Chennai*

- Improved a Next.js dashboard with 3-tier filtering and bulk operations, reducing admin review time significantly by **40%**.
- Optimized candidate pages with sortable columns, server-side pagination & debounced search over 5 indexed fields for speed.
- Developed Node.js REST APIs using MongoDB aggregation to compute job stats for **1k+** employer records in**<200m** efficiently.
- Built session state persistence for 8+ UI parameters, enabled seamless navigation, reducing redundant API calls by **~60%** effectively.

PROJECTS

AI-Powered Version Control System **May 2026 – Jun 2026**

- Architected a **full-stack** VCS utilizing 28 Express **REST API** endpoints and 4 optimized MongoDB models with Indexing.
- Engineered a custom Git-like **CLI** for local staging and UUID versioning, using **AWS S3** for remote payloads up to **50MB** & backup.
- Integrated **WebRTC** P2P live code-review with STUN/TURN NAT traversal, enabling real time peer collaboration on commits.
- Designed a Gemini-powered **RAG** pipeline for real-time duplicate issue detection, reducing manual triage by **40%** on submission.
- Built Socket.IO real-time notifications, delivering instant cross-session alerts for repository events, eliminating API polling entirely.

SSR E-Commerce Product Management Dashboard **Dec - Jan 2025**

- Built a server-side rendered admin dashboard in Next.js, reducing initial load time by **40%** and enabling CRUD for **25+ SKUs** efficiently.
- Implemented **RBAC** with 3 **OAuth** providers and 3 roles, securing all APIs behind JWT-authenticated middleware with refresh.
- Integrated **AWS S3** presigned uploads and **OpenRouter** with 3 LLMs for automated AI-driven product description generation.
- **Dockerized** application with multi-stage builds (75% smaller image) and optimized SSR metadata for **AI crawler SEO** and social.
- Built real-time analytics with MongoDB **aggregations** and Recharts, tracking 90-day sales trends and stock alerts with predictions.

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, JavaScript, Python, Java, C++,React.js, Next.js, Node.js, Express.js, TailwindCSS, shadcn/ui.

Databases & Tools: MongoDB, PostgreSQL, Prisma ORM, Socket.IO, WebRTC, AWS, GCP, JWT, Git, GitHub, Cloudinary

AI & Infra: LangChain, Langgraph, Pinecone, Google gemini, OpenRouter, n8n

Relevant Coursework: DSA, Full-Stack Web Development, GenAI Development, Data Science, AI/ML Fundamentals.

ACHIEVEMENTS

Competitive Programming / Contests **Jun 2024 – Present**

- Codeforces – Achieved maximum rating of 1443 and **Specialist** level (Handle: shipcode).
- Codechef – Achieved maximum rating of 1537 and **3 star** level (Handle: syk2448).
- Leetcode – Achieved maximum rating of 1,839 and Ranked in the **Top 6% globally** (Handle: shipcode).

FlowiseAI (YC-S23) **Apr 2026 – Present**

- Contributed to FlowiseAI's Open Source Repository (53k+ stars) – **merging 3 PRs** across the frontend and backend.
- Developed password visibility and new docstore features which are now used by their global user & developer community.

Graph & Dynamic Programming Camp **Sep 2025 , May 2026**

- Selected among **Top 7%** candidates from multiple colleges of India as a mentee for graphs & Dynamic programming camp by AlgoUniversity.
- Learned **17+** advanced graph problem-solving techniques and **2** key DP optimization techniques from a Codeforces Master.

LEADERSHIP / EXTRACURRICULAR

Head Of Web Development | TEDx IITRoorkee **Apr 2025 – Apr 2026**

- Developed a responsive production-ready TEDx website with EaseBuzz integration, driving **100+** attendees for the TED event.
- Oversaw cross-functional broader event planning and execution activities, coordinating/collaborating with a **20+** member team.

EDUCATION

Indian Institute of Technology (IIT), Roorkee **Aug 2023 – May 2027**
Bachelor of Technology in Chemical Engineering *Roorkee, Uttarakhand, India*
